MINISTER OF STATE FOR HEALTH

No.: 7116- 0/2014/NEUF

“28” January 2014, Budapest

**Mr Domokos Csuka**  
General Manager  
**MEDEXPERT**

Budapest

**Letter of Support**

I was pleased to be informed about a new method of risk assessment in cardiovascular diseases as well as a new device called “Arteriograph”, qualified to measure all parameters of arterial stiffness in one seat, developed by the collaboration of several research groups. The development can be useful to scan a group of non-communicable diseases, cardiovascular diseases in time, which problem well-known worldwide, and based on this system a primary and secondary prevention can be elaborated.

I would like to express my support for the cooperation between MEDEXPERT and relevant Turkish health authorities in accordance with the Agreement between the Government of Hungary and the Government of the Republic of Turkey on cooperation in the fields of health and medical sciences signed in 23 January, 2013 in Budapest. I believe that this cooperation will provide benefits for the participating institutions as well as their home countries.

Wishing you a fruitful cooperation and success in your activities.

Yours Sincerely,

Miklós Szócska M.D.
